Press release

Devoteam and Atrinet Ltd. seal partnership to ease business transformation with NetACE unified network management platform

Weiterstadt: July 18, 2016. Devoteam GmbH, an international IT consulting and IT services company specialized in the fields of Digital Transformation and Atrinet Ltd. the leading provider of NetACE the innovative orchestration platform capable of supporting policy-based, real-time provisioning and service assurance for both SDN/NFV and legacy networks, announced today the expansion of its partners circle.

Devoteam will use NetACE to enable its customer's automated deployment and interconnection of all components for the network scenarios as well as network service lifecycle management assuring smooth and low risk migration to the next generation networks while maximizing the greatest benefit possible from their network technology investments.

"In today's constantly advanced technology, many Service Operators, Enterprises and Utility companies are looking at new ways to transform their networks in order to reduce the risks involved with developing of new services, to reduce the time to market for service introduction and activation, with a more agile platform to be innovative," says Ohad Kamer CMO at Atrinet.

Through this new partnership, Devoteam professional services will serve customers during their transformation process with NetACE agility, simplified and automated network management capabilities. Atrinet NetACE solution helps companies to gain more control over their network infrastructure and services by providing an end-to-end service orchestration platform capable of supporting policy-based, real-time provisioning and service assurance for both SDN/NFV and legacy networks.

"We welcome Atrinet's innovative NetACE solution to our network transformation portfolio. This partnership will help us to expand our range of effective network transformation solutions, and it supports our strategy to provide support to customers on their transformation journey. Especially the capability of the Atrinet' NetACE orchestration product to cut OPEX up to 50% with fast and automatic service provisioning without broken configurations convinced us to partner with Atrinet. Thus, Devoteam will enable customers to offer new value-added services over the same infrastructures while shortening the introduction of those services from weeks to days, "declares Jürgen Hatzipantelis CEO at Devoteam GmbH and EVP at Central Europe.
